

## 3 Whistle Site Safety

**USYVL Safety Protocols** have been created. Be conscious of safety hazards, such as:

- Medivac or other emergency landing site
- Animals roaming for food or water on hot days
- Rattlesnakes
- Weather issues such as lightning, high winds, or wild fires

**USYVL Safety Protocols** if any safety issues arise:

1. Site Director will sound 3 quick blows, twice in succession, on their whistle
2. Coaches will immediately gather all of their players and head together to Site Director
3. Coach will account for all their players and verbally report any missing players to Site Director
4. Site Director will give instructions
5. Site Director will release all players and coaches with one long blow of the whistle. Parents may not take their child until all are released.
